

McMILLAN & HOLDER

Porticos & Door surrounds

MCMILLAN & HOLDER

Our Story

McMillan & Holder Ltd has its origins as an entrepreneurial British family business. It was built on years of preserving the bedrock of our historic Estates, Castles, Cottages and Cathedrals.

We took these traditional skills into new partnerships with Architects, Developers and Designers. We searched for the best suppliers, the latest technology and refined our stone to anticipate solutions for the changing needs of the market. Combining classical stone masonry with global supply offers an incomparable opportunity for exceptional value, innovation and craftsmanship.

“The results are stunning - everything was completed to the highest standard by master craftsmen who were helpful and co-operative. We are delighted and would highly recommend.”

Create your Entranceway

Experience Unmatched Quality and Value

Discover the pinnacle of natural stone craftsmanship at prices comparable to cast alternatives. At McMillan & Holder we pride ourselves on offering the finest natural stone porticos and architectural components at unbeatable prices worldwide.

With over two decades of expertise, with over two decades of expertise, we have earned the trust of organisations such as The National Trust, English Heritage, and architectural / conservation specialists. We understand the rules of classical proportions in architecture and our reputation for excellence is built on a foundation of master craftsmanship and unwavering commitment to quality.

Combining traditional craftsmanship with cutting-edge technology, our team of skilled masons employs the latest CNC cutting techniques to ensure precision and consistency in every detail. The result is award-winning architecture.

Whether you're an individual client, architect, or designer, we provide cost-effective solutions tailored to your specific needs. Our global supply network enables us to deliver superior quality stone products with unparalleled prices. Prices starting from £2,480

Porticos & Door surrounds

Few architectural elements can rival the timeless elegance and sophistication brought to a property's façade quite like a stone portico. Visually striking an elegant portico or door surround introduces grand proportions and immediate impact to the front of your home.

Since ancient times, porticos have remained a hallmark of architectural excellence and are synonymous with Georgian, Neo-Georgian, and Georgian revival style projects.

At McMillan & Holder we offer our classical range of porticos shown below, and a bespoke design service.

Whether you desire subtle modifications to one of our existing designs or envision a completely bespoke creation, our team of skilled craftsmen is dedicated to bringing your vision to life. From adjusting dimensions and proportions to incorporating intricate details and embellishments, we work closely with you to create a portico that perfectly complements your home and reflects your personal style.

Prices starting from £2,480

Why Natural Stone

Why Choose Natural Stone Over cast Alternatives?

The decision to opt for natural stone over cast alternatives is rooted in both practicality and environmental consciousness. While cast alternatives, typically made of concrete, may seem convenient, the process of creating them involves a series of resource-intensive steps.

Firstly, concrete production entails the extraction of limestone from quarries, heating it to extreme temperatures in kilns, and grinding the residue to produce cement. This is then mixed with aggregates and water before being poured into painstakingly assembled shuttering, reinforced with rebar to provide it with its structural integrity, and left for an additional 28 days to reach full strength.

In contrast, utilising quarried natural stone bypasses this elaborate process entirely. Stone processing produces only one-third of the carbon emissions produced during concrete manufacturing. In essence, choosing natural stone not only simplifies the construction process but also aligns with sustainable practices, making it an environmentally conscious and pragmatic choice for architectural endeavours.

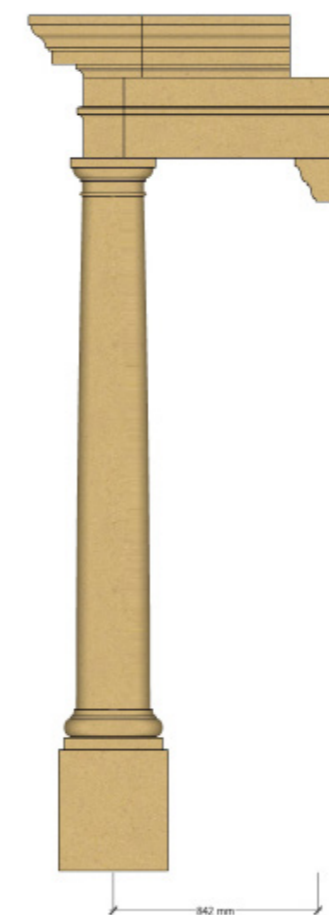

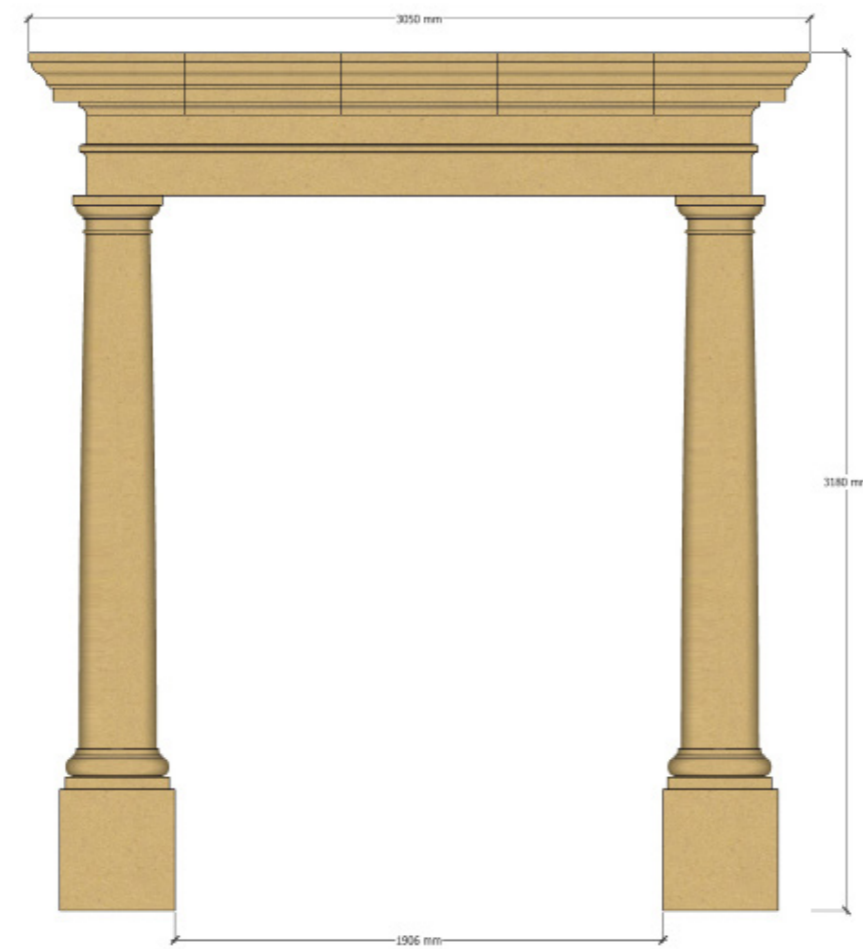

- Less delay in replacement resulting from accidental on-site damage, which can de-rail a project.
- Natural Stone is typically two and a half times stronger than cast stone. It will stand the test of time and is renowned for its durability and longevity.
- Natural stone can be sanded and fined in on site, resulting in a more detailed and perfected fit.
